# MESSAGE OF RECTOR

Dear Students,

Acıbadem University is a young and thematic university in the area of health sciences. There have been two great powers that have accelerated the establishment and development of Acıbadem University; first of which is the wish for of Acıbadem Healthcare Group to pass on the experience gained and knowledge acquired while offering quality health care services, to future generations. The second is the wish of the leading academicians of our country working within the group wishing to contribute to the health sciences by educating students and their research.

Educating professionals who are knowledgeable in all areas of health, who are researching, and questioning with our student centred, dynamic and modern education programs which encourage research is the main objective of our university.

In line with these objectives, we are paying special attention to the infrastructure work required to offer world class education. The contribution of our simulation centre to students, who in all our education programs first learn from dozens of scenarios before encountering patients, is incredible. We know that the bar on health education is now in a different place, and that Acıbadem moved that bar much higher...

We are chasing all kinds of innovation to strengthen education, and we will continue to do so. Learning what we do not know is also an absolute must for us too, but we are teaching what we already know well. Our efforts to improve will always continue, and we will look to the future with strength, confidence and hope...

Ahmet Şahin, M.D., Prof.

Rector

# MESSAGE OF DEAN

Dear Students,

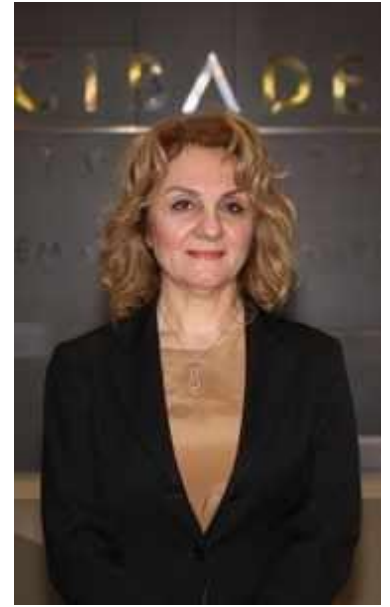

It is aimed that the professional knowledge and skill development of the students of the Faculty of Health Sciences should be at international standards. The dynamic and experienced faculty member staff created for this purpose is getting stronger with its trainers in the field of basic sciences and clinical sciences.

Kerem Campus Intellectuals have advanced technological infrastructure in addition to theoretical training, practical training, modern laboratories, nursing practical training part of our country's most well-equipped and modern at the center of simulation training are provided. Strong teaching staff, and the technological facilities of the campus, in addition to the practical training of the students, the faculty is one of the strengths of faculty members and the majority of which are equipped with the latest technology under the supervision of experienced colleagues Acibadem Saėlık is the ability to hospitals and health centres.

Acibadem Mehmet Ali Aydin University Faculty of Health Sciences, the main goal of professionally qualified in their field, equipped and productive scientific thinking, students are able to use the technology very well, foreign languages, national and in the international arena itself, the institution of work is to educate health care professionals successfully able to represent our country and contemporary.

Murat Bař, Ph.D. Prof. (Dean)

# MESSAGE FROM HEAD OF NURSING DEPARTMENT

Nursing is an applied health discipline based on scientific knowledge. It has a multi-faceted responsibility and role for the individual, family and society in meeting the needs such as care, relaxation, healing and information that people need at every stage of their life process. Nursing interventions applied in today's health care environment are carried out with the use of evidence based on research results. In order to meet the needs of the individual, family and society, the nurse initiates and makes clinical decisions in line with his knowledge. In order for nursing care to be effective, safe and adequate, interventions must be carefully and critically evaluated. All these reveal the necessity of continuing the theory and practice of nursing professional education with contemporary methods, with a philosophical belief in the uniqueness of human beings.

Aiming to train qualified manpower, in Acibadem University Faculty of Health Sciences Nursing Department; As in the training programs of all disciplines based on practice, theoretical knowledge and clinical experience are integral parts that complement each other. At Kerem Aydınlar Campus, which is equipped with modern technology that supports its philosophy, vision, mission and nursing education values, we put it into practice in university hospitals by providing training with simulation laboratories and equipment, where each student can transfer their theoretical education into practice.

As a result, the department aims to train world-class nurses who can provide excellent evidence-based care to the patient/healthy individual.

Ükke Karabacak Ph.D., Prof. (Head)

# NURSING DEPARTMENT PURPOSE, VISION, MISSION AND VALUES

## Our Goals;

The aim of the program is to train nurses employed in health care institutions at all levels, who can provide holistic care with a systematic problem-solving approach and ethical sensitivity at national and international standards.

Performance indicator: More than 90% of graduates are employed in healthcare organizations Graduates take on the role of educator, researcher and leader who will guide the development of care and profession in a team understanding with innovative applications based on scientific data and technology.

Performance indicator: They should assume the role of educator, researcher and leader, which will guide the development of the profession, by more than 25% in the process following graduation. Graduates continue their academic, professional and personal development with the awareness of lifelong learning.

Performance indicator: Continuing their professional and academic development above 25% after graduation

## Our Vision;

is to be the leading, most preferred and referenced nursing education institution with its nursing education, practice and research at national and international standards.

## Our Mission;

Sis to train world-class leader nurses who can provide safe, evidence-based and quality care for healthy/sick individual and society; and the nurses who think critically, make critical decisions, have ethical and universal values, research skills, team understanding, innovative, difference, sensitive to culture, and contribute to the development of the profession.,

## Our Fundamental Values;

Acıbadem University Faculty of Health Sciences Department of Nursing;

- Accepts that the human being as a whole is unique.
- Emphasizes being faithful, reliable and accountable to ethical principles in the services it provides to the society,
- Believes in the superiority of science, adopts a systematic approach,
- Believes in the importance of corporate belonging, effective communication and teamwork in success.

## Education Model of the Program

Nursing undergraduate program was created in the "Classical Education Model", which is one of the programs based on the structure of the disciplines. The purpose of the disciplinary programs is to teach the concepts, theories and principles specific to that discipline, research, practice, education and management. In this way, it is essential to integrate, organize, show and develop the limits and gaps of the knowledge that falls within the field of discipline. In the structuring of the Acibadem Mehmet Ali Aydınlar University Nursing Department model, developments in meeting the health care needs of the society on a national and international scale were taken into account. The program consists of theoretical and practical parts of nursing education in the Classical Education Model. Lessons are carried out by academic members / staff who are experts in their fields. In line with the classical education model, all departments include course contents; It is planned within the framework of the main concepts of human, health/disease, environment and nursing and is carried out by using active learning methods to support students' learning at cognitive, psychomotor and affective levels. Different nursing models and theories are used while conducting courses specific to the department. Life Activities-Based Nursing Model, Functional Health Patterns Model, OMAHA System and Orlando's Deliberative Nursing Process and Peplau's Theory of Interpersonal Relations are the models used Collaborative Model.

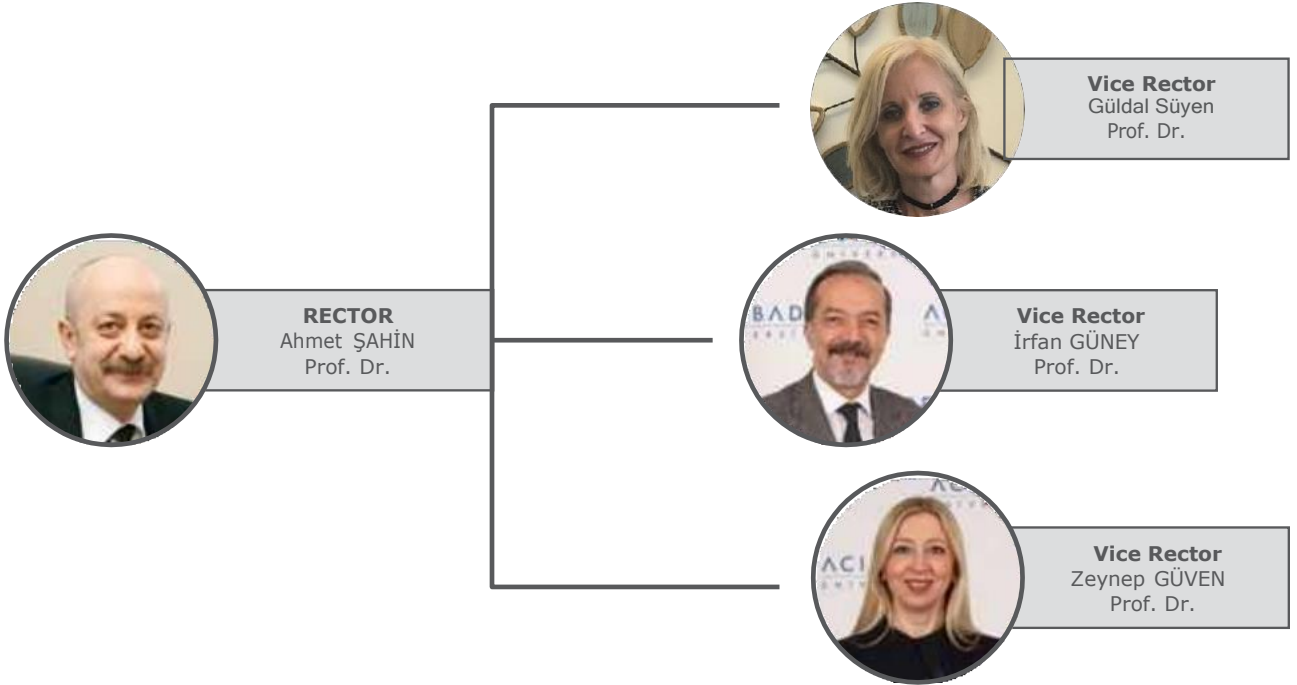

In this model, nurse practitioners are responsible for teaching and clinical practice under the direction of faculty members. Clinical practice is accomplished by planning periodic and weekly objectives. These objectives are shared by faculty/staff with students and clinical nurse specialists. The nursing process is used as a problem-solving approach in the care of the individual. The "NANDA" diagnostic classification system is used in making nursing diagnoses, planning, implementing, and evaluating care. The principles used in establishing program objectives are listed below.

- Healthcare Undergraduate Core Education Program (HUCEP)
- Higher Education National Qualifications Framework-6
- Nursing Law
- Nursing Regulation published in the Official Gazette No. 27515
- Supplementary Regulation on Amendments to the Nursing Regulation published in the Official Gazette No. 27910
- 26775 "Regulation on the Determination of Minimum Education Requirements for Medical, Nursing, Midwifery, Dental, Veterinary, Pharmaceutical and Architectural Education Programs" published in the Official Gazette No. 26775
- International Nurses Association Code of Ethics for Nurses
- Turkish Nurses Association Ethical Principles and Responsibilities Guide for Nurses

1. Has the basic knowledge, attitude and skills to provide safe and effective nursing care in the process of protecting, improving, treating and rehabilitating the health of the individual, family and society.
2. Provides nursing care in line with the nursing process, using evidence-based knowledge and critical thinking skills.
3. Uses problem solving, conflict and crisis management skills while performing nursing care practices in ordinary and extraordinary situations.
4. Collaborates with health care team members, communicates effectively, and present professional autonomy within the team.
5. Uses basic professional competencies in the fields of education and management.
6. With awareness of social responsibility, cooperates with professional organizations and non-governmental organizations and takes part in projects and events.
7. Participates in scientific research, critically evaluates scientific publications and reflects them into practice.
8. Maintains nursing care practices in accordance with laws, ethical principles, cultural values, institutional policies and quality processes.
9. With the awareness of lifelong learning, he/she continues professional and individual development and reflects this in his/her practices.
10. In order to continue her/his development, professional communication and practices, uses English at least at the "European Language Portfolio B1 General Level".
11. Uses information systems and health care technologies in nursing care practices.

# LIBRARY

Centrally located on Kerem Aydınlar Campus, the library has a collection that supports the academic programs of the university and publications mainly consist of Health Sciences. As part of the Central Library, Acibadem Mehmet Ali Aydınlar University Atakent Hospital Library was opened in 2014 and Acibadem Maslak Hospital Library was opened in 2015.

The central and branch libraries have a total area of 1441.16 square meters and a seating capacity of 368 people. Offering a modern and comfortable working environment to its users, the library is open 24/7 during the academic year. The library has a computer study room and 18 study rooms that users can reserve. Printed Collection: There are 29,092 materials in the types of books, printed periodicals, theses, CD-Roms and DVDs in Central, Atakent and Maslak Libraries.

Electronic Collection: With 36 databases subscribed by the library, 61,652 e-journals, 151,660 e-books, 2,592,727 full-text theses, evidence-based medicine databases, bibliometric tools and indexes, and newspapers can be accessed. ACU members can access to the subscribed databases from out of the campus.

Library Trainings: Library staff provide library training to students in line with the demands of faculties and colleges. Trainings can be done in one part of the course, one or more sessions can be organized. In the trainings, information is given on the use of library catalogs, access to library databases and searching for academic publications. In addition, author workshops for young academics and graduate students and user trainings specific to certain databases can be organized.

# INTERNATIONAL OFFICE

The ERASMUS+ Program covers projects that enable higher education institutions to realize student and staff (academic and administrative) mobility by partnering with higher education institutions in the program countries. With this activity, it is aimed to improve the qualifications of higher education students and staff and to provide these people with professional development opportunities abroad. Thus, to higher education or some higher education institutions to increase opportunities for overseas training of new graduates in continuing education to gain the skills they need to make the transition from business to higher education or improve their skills to obtain knowledge of the practice of pedagogical personnel, it is intended to work.

Acibadem Mehmet Ali Aydınlar University has been carrying out student and staff (academic and administrative) mobility within the scope of the program since 2009.

Students, faculty members / staff and administrative staff of the Faculty of Health Sciences can participate in Erasmus+ programs at another higher education institution during certain periods. Acibadem University International Students and Academic Relations Office (UO) organizes an information meeting about program promotion and processes every year during the application periods. Information about the applications is announced on the website of our university and also announced to the students and staff by e-mail.

# LABRATORY AND CLINICAL RACTICE

## CASE

The central purpose; do some academic work on simulation and modeling to develop projects, to organize courses and seminars, these programs and applications through the University's public institutions and agencies, the private sector and international organizations to contribute to the improvement of relations with it.

CASE consists of two centers - Clinical Simulation and Advanced Flat Endoscope - Robotic Surgery Training Center, which is located within the structure of Acıbadem Mehmet Ali Aydınlar University. Clinical Simulation Center A Block 4 on an area of 455.2 m<sup>2</sup>. It is located on the floor. In the center, a nursing simulation lab 1, 2 emergency room, delivery room 1, 1, intensive care, 1 operating room, medicine preparation room 1, 1 exam, 1 Skill Lab, Control Room 8, 4 ratings, rooms, patient rooms, 1 bed, and male / female peeling consists of a room. Advanced Endoscopic - Robotic Surgery Training Center CASE A Block D -1 on an area of 293.66 m<sup>2</sup>.on the floor.

The center consists of 2 skill laboratories, 2 evaluation rooms, 4 patient examination rooms, makeup room, male /female Decollete cabinets, student lobby and 2 inter-body sections. The center is accredited by the European Community under the umbrella of the European Association of Medical Professionals (UEMS), the European Network of Accredited Skill Centers (NASCE) and the Association for Simulation in Health (SSH) accreditation certificates.

## Computer and Language Laboratory

17 computers in the central library, 27 computers in the English laboratory, 143 computers in the computer laboratory, and 18 computers at various points on campus were made available to students. In addition, SPSS 22.0 and MedCalc statistical package programs are available for students and faculty to analyze and use for educational purposes. Students check the current announcements from 30 digital boards located on campus. There is one computer in the rooms of the faculty members / staff of the Nursing Department. These computers are connected to a copier device that is a printer, fax and scanner feature that the department uses in common.
