MESSAGE OF RECTOR

Dear Students,

Acibadem University is a young and thematic university in the area of health sciences. There have been two great powers that have accelerated the establishment and development of Acibadem University; first of which is the wish for of Acibadem Healthcare Group to pass on the experience gained and knowledge acquired while offering quality health care services, to future generations. The second is the wish of the leading academicians of our country working within the group wishing to contribute to the health sciences by educating students and their research.

Educating professionals who are knowledgeable in all areas of health, who are researching, and questioning with our student centred, dynamic and modern education programs which encourage research is the main objective of our university.

In line with these objectives, we are paying special attention to the infrastructure work required to offer world class education. The contribution of our simulation centre to students, who in all our education programs first learn from dozens of scenarios before encountering patients, is incredible. We know that the bar on health education is now in a different place, and that Acibadem moved that bar much higher...

We are chasing all kinds of innovation to strengthen education, and we will continue to do so. Learning what we do not know is also an absolute must for us too, but we are teaching what we already know well. Our efforts to improve will always continue, and we will look to the future with strength, confidence and hope...

MESSAGE FROM HEAD OF NURSING DEPARTMENT

Nursing is an applied health discipline based on scientific knowledge. It has a multi-faceted responsibility and role for the individual, family and society in meeting the needs such as care, relaxation, healing and information that people need at every stage of their life process. Nursing interventions applied in today's health care environment are carried out with the use of evidence based on research results. In order to meet the needs of the individual, family and society, the nurse initiates and makes clinical decisions in line with his knowledge. In order for nursing care to be effective, safe and adequate, interventions must be carefully and critically evaluated. All these reveal the necessity of continuing the theory and practice of nursing professional education with contemporary methods, with a philosophical belief in the uniqueness of human beings.

Aiming to train qualified manpower, in Acibadem University Faculty of Health Sciences Nursing Department; As in the training programs of all disciplines based on practice, theoretical knowledge and clinical experience are integral parts that complement each other. At Kerem Aydınlar Campus, which is equipped with modern technology that supports its philosophy, vision, mission and nursing education values, we put it into practice in university hospitals by providing training with simulation laboratories and equipment, where each student can transfer their theoretical education into practice.

As a result, the department aims to train world-class nurses who can provide excellent evidence-based care to the patient/healthy individual.

Ükke Karabacak Ph.D., Prof. (Head)

NURSING DEPARTMENT PURPOSE, VISION, MISSION AND VALUES

Our Fundamental Values;

Acibadem University Faculty of Health Sciences Department of Nursing;

- Accepts that the human being as a whole is unique.
- Emphasizes being faithful, reliable and accountable to ethical principles in the services it provides to the society,
- Believes in the superiority of science, adopts a systematic approach,
- Believes in the importance of corporate belonging, effective communication and teamwork in success.

Education Model of the Program

Nursing undergraduate program was created in the "Classical Education Model", which is one of the programs based on the structure of the disciplines. The purpose of the disciplinary programs is to teach the concepts, theories and principles specific to that discipline, research, practice, education and management. In this way, it is essential to integrate, organize, show and develop the limits and gaps of the knowledge that falls within the field of discipline. In the structuring of the Acibadem Mehmet Ali Aydınlar University Nursing Department model, developments in meeting the health care needs of the society on a national and international scale were taken into account. The program consists of theoretical and practical parts of nursing education in the Classical Education Model. Lessons are carried out by academic members / staff who are experts in their fields. In line with the classical education model, all departments include course contents; It is planned within the framework of the main concepts of human, health/disease, environment and nursing and is carried out by using active learning methods to support students' learning at cognitive, psychomotor and affective levels. Different nursing models and theories are used while conducting courses specific to the department. Life Activities-Based Nursing Model, Functional Health Patterns Model, OMAHA System and Orlando's Deliberative Nursing Process and Peplau's Theory of Interpersonal Relations are the models used Collaborative Model.

In this model, nurse practitioners are responsible for teaching and clinical practice under the direction of faculty members. Clinical practice is accomplished by planning periodic and weekly objectives. These objectives are shared by faculty/staff with students and clinical nurse specialists. The nursing process is used as a problem-solving approach in the care of the individual. The "NANDA" diagnostic classification system is used in making nursing diagnoses, planning, implementing, and evaluating care. The principles used in establishing program objectives are listed below.

- Healthcare Undergraduate Core Education Program (HUCEP)
- Higher Education National Qualifications Framework-6
- Nursing Law
- Nursing Regulation published in the Official Gazette No. 27515
- Supplementary Regulation on Amendments to the Nursing Regulation published in the Official Gazette No. 27910
- 26775 "Regulation on the Determination of Minimum Education Requirements for Medical, Nursing, Midwifery, Dental, Veterinary, Pharmaceutical and Architectural Education Programs" published in the Official Gazette No. 26775
- International Nurses Association Code of Ethics for Nurses

LIBRARY

Library

The library, which is centrally located on the Kerem Aydınlar Campus, has a collection that supports the academic programmes of the university and the publications mainly consist of Medical and Health Sciences.

There are two branch libraries affiliated to the Central Library of our university, Acıbadem Atakent Training and Research Hospital Library and Acıbadem Maslak Hospital, which serve our academic staff and internship students.

The central and branch libraries have a total area of 1747,51 square metres and a seating capacity of 502 people. The library, which offers its readers a modern and comfortable working environment, is open 24/7 during the academic year. The library has a computer study room and 18 study rooms that users can reserve.

Collection

Our library, which prioritises reader's benefits and publication quality, continues to develop its collection in order to support educational activities, academic studies and intellectual development in this direction.

Printed Collection: The Library has 36.939 printed books, printed periodicals, printed theses, CD-Roms, DVDs, etc. in the Central, Atakent and Maslak Libraries.

Electronic Collection: With 43 databases subscribed by the library, 58.528 interdisciplinary e-journals, 175.330 e-books, 2,592,727 full-text theses, 110.244 medical and surgical videos, evidence-based medicine database, bibliometric tools and indexes, newspapers can be accessed.

Library Trainings

Library staff provide library training to users upon request and need. In the trainings, information is provided on the use of the library catalogue, access to library databases and searching for academic publications. In addition, author workshops for young academics and graduate students and user training for specific databases can be organised. The ACU Library Skills webinar series enables library users to improve their information literacy skills and make the most of the resources of the University Library. Sessions cover topics such as library services and facilities, using the online catalogue, accessing subscribed databases, mobile access, accessing academic publications, referencing, bibliometrics, assessment and evaluation.

Book Purchase Request

All Members of Acıbadem University can make requests and suggestions regarding the purchase of new books and subscriptions for the library collection. Requests can be made by logging in to <https://katalog.acibadem.edu.tr> or by sending an e-mail to the Library e-mail address.

The ERASMUS+ Program covers projects that enable higher education institutions to provide student and staff (academic and administrative) mobility by establishing partnerships with higher education institutions in the program countries. This activity aims to improve the qualifications of higher education students and staff and to provide these people with professional development opportunities abroad. Thus, increasing the overseas education opportunities of those who continue their higher education or who have recently graduated from higher education institutions and providing them with the skills they need to transition from education to business life; for higher education personnel to obtain business practice knowledge or increase their pedagogical skills.

Acibadem Mehmet Ali Aydınlar University has been carrying out student and staff (academic and administrative) mobility within the scope of the program since 2009. Students, faculty members/staff and administrative staff of the Faculty of Health Sciences can participate in Erasmus+ programs at another higher education institution during certain periods. Acibadem University International Students and Academic Relations Office (IO) organizes an information meeting every year regarding the application periods and processes. Information about applications is announced on our University's website and is also announced to students and staff via e-mail.

LABRATORY AND CLINICAL RACTICE

CASE

The central purpose; do some academic work on simulation and modeling to develop projects, to organize courses and seminars, these programs and applications through the University's public institutions and agencies, the private sector and international organizations to contribute to the improvement of relations with it.

CASE consists of two centers - Clinical Simulation and Advanced Flat Endoscope - Robotic Surgery Training Center, which is located within the structure of Acıbadem Mehmet Ali Aydınlar University. Clinical Simulation Center A Block 4 on an area of 455.2 m². It is located on the floor. In the center, a nursing simulation lab 1, 2 emergency room, delivery room 1, 1, intensive care, 1 operating room, medicine preparation room 1, 1 exam, 1 Skill Lab, Control Room 8, 4 ratings, rooms, patient rooms, 1 bed, and male / female peeling consists of a room. Advanced Endoscopic - Robotic Surgery Training Center CASE A Block D -1 on an area of 293.66 m².on the floor.
